## ArcIMS® Gazetteer

The data contained on this DVD allows you to create an ArcIMS® Gazetteer metadata service.

With this service, you can find places with a given name in a given area as well as the geographic area associated with a gazetteer place. Gazetteer places are provided for the world.

### With ArcIMS Gazetteer, you can

- Load a gazetteer metadata service from this disc into a geodatabase using scripts provided with ArcIMS.
- Load a custom set of gazetteer places from shapefiles on this disc into an existing gazetteer metadata service with the ArcCatalog™ Gazetteer Loader.
